## Wrap Up: Indo Pacific 2022 International Maritime Expo

We enjoyed two great days at the Indo-Pacific International Maritime Exposition at the Sydney International Convention Centre. The show brought together more than 700 businesses from the defence industry and delegations from over 40 nations. The event provided a wonderful opportunity to catch up with friends and colleagues from a variety of our valued partners. New friends were also made and connections were forged. Seeing and learning about the exciting innovations occurring in Australia was fascinating. Undoubtedly, this is an exciting time for the entire defence industry.

Among the topics of conversation were the ongoing supply chain issues and how Extel is helping its partners through the current hurricane. A number of exhibitors were also keen to discuss Australian Sovereign Capabilities to increase their AIC (Australian Industry Content). Extel, an Australian owned AS9100 Advanced Electronic Manufacturer, is a great partner for companies seeking AIC in their supply chain.

As we look forward to reconnecting and continuing the discussions in the coming weeks, we are excited about what lies ahead.
