Creating a Better Future Through Client Feedback

Having helped our clients create a better future for over 30 years, it is in our DNA to always strive for growth and excellence.

Each year, Extel seeks feedback from businesses with which we have partnered to develop life-changing products. Understanding their own perspective of the Extel experience is essential to improving and strengthening our offerings.

Furthermore, we wanted to express our appreciation for our clients' time and thoughtful feedback by offering them the opportunity to select a local charity we would donate to on their behalf.

The organizations to which we donated this year were:

AUSTRALIA

[Alannah and Madeline Foundation](#)

[Animals Australia](#)

[Black Dog Institute](#)

USA

[Angels Foster Family Network](#)

[Autism Society San Diego](#)

[San Diego Humane Society](#)

By including non-profit organizations and charities in the way we conduct business, we align with our core purpose. In our selection of organizations, we value their commitment to making this world a better place for animals or people in need.

We are committed to raising awareness of mental health, child safety, and animal safety issues to change the odds for those affected. Their progress is directly supported by our donations. Our sincere thanks go out to our clients once again for their feedback and donations.
